Profile

Motivated and detail-oriented Software Engineering student at Ghana Communication Technology University (GCTU). I am skilled in modern web technologies including React, TypeScript, Vite, and Tailwind CSS, with a strong foundation in HTML, CSS, and JavaScript. Experienced in building responsive, user-friendly, and scalable applications. I am passionate about applying my skills in real-world environments, learning from industry professionals, and contributing to impactful technology projects.

Skills

- Frontend Development: HTML5, CSS3, JavaScript (ES6+), React, TypeScript, Vite, Tailwind CSS
- UI/UX Design: Responsive Design, Accessibility Best Practices
- SEO: On-page SEO, Performance Optimization, Meta Tags, Semantic HTML
- Version Control: Git, GitHub
- Tools & Platforms: VS Code, Chrome DevTools, Supabase, Vercel
- Soft Skills: Problem-Solving, Teamwork, Communication, Adaptability

---

Projects

- MoneyGrid – Free web-based personal finance and expense tracking application designed for global users to manage income, expenses, and budgets securely and efficiently. Built with modern frontend technologies and integrated backend

services.

Link: https://moneygrid.vercel.app/

- TradeLens – A modern web application for tracking and managing trade-related data, built with React, TypeScript, Vite, and Tailwind CSS.

  Link: https://trade-lens-finance.vercel.app/

- LeapBod – Centralized student platform showcasing events and opportunities with search and filter functionality.

  Link: https://leapbod.vercel.app/

- Car Rental Website (Frontend) – Modern interface for browsing and booking cars.

  Link: https://bryt19.github.io/Zoom-Rides/

- Book Club Website – Web app for creating and managing book clubs, tracking events and reading progress.

  Link: https://book-club-hub.vercel.app/
