PROFESSIONAL SUMMARY

Software Engineer and Web3 developer, currently completing a BSc. in Software Engineering at Ghana Communication Technology University (GCTU). Builds responsive web applications and Ethereum smart-contract products with React, TypeScript, Tailwind CSS, Solidity, ethers.js, and Supabase. Has shipped 8+ deployed products spanning finance, inventory management, AI support, climate technology, and blockchain. Placed 2nd at the EAG Hackathon 2026 and in the top 10 at HackHive 2.0. Committed to clean, maintainable code, effective teamwork, and continuous learning.

EDUCATION

Ghana Communication Technology University (GCTU) Expected November 2027
Bachelor of Science (BSc.) in Software Engineering (In Progress)

WORK EXPERIENCE

Frontend Developer Intern February 2025 – April 2025
Git Plus

- Developed and maintained frontend features for client applications.
- Debugged and optimized applications, improving performance and user experience.
- Used Git and GitHub for version control and took part in code reviews and Agile workflows.

SELECTED PROJECTS

TrustLock — On-Chain Escrow & Reputation Platform [Live Demo](#)
React, TypeScript, Tailwind CSS, Solidity, ethers.js, MetaMask, Ethereum

- Built an Ethereum-based escrow platform for rentals, verified deliveries, and freelance transactions.
- Designed smart-contract flows that hold funds until agreed conditions are met.
- Implemented wallet connection and transaction features for the Web3 frontend.
- Presented at the EAG Hackathon 2026 and placed 2nd.

TrustLock (WeWire Version) — Escrow with Sandbox Transactional Rails [Live Demo](#)
Team Project | TrustLock stack with WeWire Sandbox for transactional rails

- Built a WeWire version of TrustLock that uses WeWire's sandbox as the transactional rails for escrow payments.
- Connected the escrow flow to WeWire's sandbox so funds move and settle through those rails.

Lumina — AI Support Assistant [Live Demo](#)
React, TypeScript, Tailwind CSS, Vercel

- Built an AI-powered support interface with a conversational chat experience.
- Implemented typing indicators, response copying, and response regeneration.
- Designed a polished, responsive layout for desktop and mobile.

MoneyGrid — Personal Finance Management Platform [Live Demo](#)
React, TypeScript, Tailwind CSS, Supabase

- Developed an app for tracking income, expenses, budgets, and financial insights.
- Integrated secure authentication and a cloud database with Supabase.
- Built a responsive dashboard optimized for desktop and mobile.

Klavora — Pharmacy Inventory Management System [Live Demo](#)
Team Project | React, TypeScript, Supabase

- Developed interfaces for managing medicines, inventory, and pharmacy operations.
- Improved usability with clean UI components and contributed to a landing-page redesign.

LeapBod — Student Opportunities Platform [Live Demo](#)
Team Project | React, TypeScript, Tailwind CSS

- Built features for discovering internships, scholarships, jobs, and student events.
- Implemented search and filtering, with responsive layouts across devices.

TradeLens — Financial Dashboard

[Live Demo](#)

React, TypeScript, Tailwind CSS

- Developed a responsive financial dashboard with reusable components, focused on performance, accessibility, and clean design.

AWARDS AND ACHIEVEMENTS

- | | |
|--|------|
| • 2nd Place, EAG Hackathon (Accra) — TrustLock | 2026 |
| • Top 10, HackHive 2.0 Hackathon (DASA) | 2026 |

CERTIFICATIONS

Workflow Specialist — Asana
Responsive Web Design — freeCodeCamp
Cyber Laws — Cambridge International Qualifications
Basics of Operations and Project Management — UniAthena
Binance Expert — Binance School Africa
Social Media Marketing — HP LIFE
Data Privacy & Protection
Certificate in Tech Innovations

SKILLS

Languages	HTML5, CSS3, JavaScript (ES6+), TypeScript, Rust (learning), Solidity (learning)
Frontend	React, Vite, Tailwind CSS, React Router, TanStack Query
Web3	Ethereum, Solidity, ethers.js, MetaMask, Sepolia
Backend & Databases	PostgreSQL, Supabase, REST API integration
Tools	Git, GitHub, VS Code, Chrome DevTools, Vercel
Practices	Responsive Design, UI/UX, Accessibility, SEO, Performance Optimization, Agile Development

INTERESTS

Frontend and backend development, Web3, UI/UX design, open source, SEO, web performance
